NEWS FROM THE SKY

No. 2/August 2011

Stay in Touch with the SKY.

ANTEA 2

The latest member of the SKY's performance gliders released newly in sizes S and XL. [Check SKY web](#) for the certification, images and technical data of the new wing. ANTEA 2 M, L and XL were tested 25 kg overloaded for M, L and 15 kg for XL for paramotoring, which proves that even with the weight of the motor ANTEA 2 meets the EN/LTF requirements. Even overloaded, ANTEA 2's behavior is always predictable and safe.

ANTEA 2 & FIDES 3

now come with a reinforced leading edge thanks to **ADIPRENE TECHNOLOGY**. **ADIPRENE** is a polyurethane elastomer with exceptional abrasion resistance, strength, outstanding elasticity and a low memory effect.

ADIPRENE is used to make a mylar nose reinforcement firmer improving its lifespan and the shape of the leading edge. Main advantages: lighter canopy, longer life-span, easily packed.

REVEL 2

EXCITE 3 & REVEL 2

The harnesses just gained LTF, certification completed. Check the web for the [certificates](#).

THE FUTURE OF 2 LINERS

Due to the recent incidents at the 12th FAI Paragliding World Championship in Piedrahita, FAI/CIVL decided to suspend Open Class wings. Rule 12.1.1.2 of Section 7B of FAI Sporting Code bans Open Class gliders in FAI Category 1 championships for the period of the suspension.

Organisers of FAI Category 2 events were also strongly recommended to consider whether Open Class gliders should be permitted to compete for the period of the suspension.

To sum it up - Open Class certificated gliders are not allowed during competition.

The national federation, test laboratories, designers and contestants are currently trying to come up with a solution to this rather gloomy situation. No matter what, you can enjoy the end of the season XC flights with EOS.

Wishing you cloudless skies and a lot of flying adventures.

Your SKY Team

SKY R&D TEAM

has been given a NEW TEST RIG to test the harnesses, foam and air-bag protectors. With a complete range of testing equipment we are able to achieve the highest level of safety of our harnesses.

NEW SKY CATALOGUE

Born after 6 months of labour, the NEW SKY CATALOGUE enters the paragliding world with 80 pages, 700 pictures, innovative graphic charts, descriptions of 4 reserves, 12 gliders, 9 harnesses and accessories. All set in an unmistakable SKY storyline.
